Keri,
Sounds like things are falling into place for you. I have some plants which you might use as a negative control of the same genus. I have four salvia farinacea plants.

Hi Keri-

Yes, Julie and I have been in touch and I have been in touch with a BU lawyer as well as Dr. Cotton. Julie is waiting on a formal letter from BU which I need to write and this will need to be reviewed by our attorney and signed by Dr Cotton. Once this week of finals has finished as well as two homicide cases and grades are submitted I can finalize this letter for you. I appreciate your frustration that this has not been finalized. However, this has never prevented you from conducting your work at BU and there has been far more communication regarding this topic than you are aware of. I appreciate your patience.

Adam

Subject: Internship Status

Hi Adam,

Just checking in about the status of the internship. Have you been in contact with Julie lately? I am wondering if it is necessary to go through all these motions if she is just looking for a simple reponse. I would really like to get in the lab ASAP. I hate to bother you constantly but this has been "up in the air" since the beginning of August, nearly 4 months later I still don't have an answer. I have been trying to be as patient as I can be, but at the start of the Spring semester I will need to start making serious steps towards my project, and I need to know for sure whether or not I will be able to get into the drug lab. If there is anything I can do on my part to move this along please let me know. I would be happy to help.

Thank you!

Keri
